LOCATION ANALYSIS

NORTHERN CYPRUS
Northern Cyprus is located on the north-eastern coast of the island of Cyprus in the eastern Mediterranean Sea. It is bordered by the Mediterranean Sea to the north and east, and by the Republic of Cyprus to the south and west.

FAMAGUSTA
It's a city on the east coast of North Cyprus. Famagusta is an important commercial hub of Northern Cyprus and has historical sites, including the walled city, Salamis, the Othello Castle

Çanakkale
The site is situated in Çanakkale district to the north of the city center and south of gazimagusa –lefkosa highway the area is known for its modern residential areas, educational institutions, and commercial establishments.

S

• Easy access to the site
• Safety
• Summer breeze
• Proximity to the lake
• Scenic views
• Quiet environment
• Abundance of green areas

W

• Lack of parking lot
• Lack of bicycle roads
• Lack of social areas

O

• Flat land
• Soil suitable for agricultural use
• Climate conducive to the use of solar panels
• Potential for landscaping design
• Opportunity to design outdoor spaces

T

• Located in an unrecognized country
• Abundance of mosquitoes
• Earthquake-risk zone
• Possibility of crowded areas due to the nearby football field

Social-Analysis :

Daily lives and community networks :

- the daily lives of the locals are centered around family activities, neighborhood interactions, and recreational use of the nearby football club and stadium. Teenagers with special needs may experience social isolation due to the lack of accessible public spaces, making the Learning Center an important hub for fostering integration. The center can strengthen community networks by providing a space for social interaction, learning, and activities that bridge connections between teens with special needs, their families, and local residents.

Active space

- The football club (coffee)
- the stadium for the club
- Clothes shop

Demographics:

- the population in the niberhood is a mix of local families, with a relatively small proportion of facilities catered toward individuals with disabilities. In the target demographic—teenagers with special needs—there is a wide range of cognitive and physical abilities. The Learning Center will need to accommodate this diversity through adaptive design and programming, ensuring that spaces are accessible, inclusive, and tailored to varying degrees of mobility and interaction needs.

Cairnsfoot Special Needs School

ARCHITECTS: STUDIO OF
NBR SARCHITECTURE
YEAR: 2018 SCHOOLS
BRİGHTON-LE-SANDS, AUSTRALİA

The vision for the project was to create an environment that both shelters and challenges students. Shelter being at the heart of human need for safety and challenge being key to a child’s development. By integrating these ideas into play, over time students develop the confidence and skills to reach their full potential. Creating environments with a human focus is core value of the NBR S team.

Scenario

Designed for autistic individuals, this school features a design that focuses on developing sensory abilities through daily activities and educational spaces. The school will provide a comprehensive education to help adolescent autistic individuals gain more life experience and carry out their daily activities with ease. It includes sections to develop visual skills, natural environments to develop sensory skills, educational spaces to develop cognitive thinking, sports sections to develop physical abilities, and sensory sections to develop auditory skills. Additionally, there are sections with group activities to develop social behavior. Adolescent autistic individuals who receive education at this school will develop all kinds of daily needs, increase their social skills, and make a difference with their sensory abilities. By offering a natural and quiet environment, the school facilitates learning by accelerating education with spaces specially designed for them. The school also includes activities that will facilitate communication between all autistic individuals and their visiting families. It is equipped with healthcare facilities and provides psychiatric support. Designed to be completely safe for adolescent autistic individuals, this school provides all kinds of support and opportunities for our friends in our society, creating a wonderful environment for our friends to live a more comfortable and orderly life.

Concept 1: Flexable Adaptation with Technology

The design draws inspiration from the continuous growth and development seen in nature, symbolizing the journey of personal evolution and learning for teenagers with autism. Just as plants grow and adapt through nurturing environments, the learning center is envisioned as a space that fosters gradual improvement through supportive, sensory-friendly environments. The architecture reflects organic forms, with spaces that evolve from intimate, quiet zones to open, interactive areas, encouraging exploration, self-expression, and growth. The building’s natural integration with its surrounding through green spaces, natural light, and sustainable materials mirrors the holistic ,development of each individual, embracing change and fostering their unique potential.

Architectural Program		
Main Foyer	Administration	600m²
Individual Offices	Main Entrance	100m²
	Administration Office 1	20m²
	Administration Office 2	20m²
	Administration Office 3	20m²
Meeting Rooms	Large Meeting Room	60m²
	Small Meeting Room	40m²
Staff Area	Supports	100m²
	Storage	40m²
	Break Room/Lounge	80m²
	Wc	40m²
Circulation Areas	Hallways etc.	80m²
Library & Resource Center	Education	2500m²
Detail	Quiet reading zones with soft lighting and acoustic control	500m²
Collaborative Work Areas		400m²
Detail	Flexible seating arrangements, soundproof areas for group work	
Workshops		600m²
Detail	Divided into specific zones for different activities (simulation, visual arts, textile, cooking, etc.)	Each workshop: 150m² on average.
Sensory Rooms		400m²
Detail	Spaces designed for resting and learning, with sensory-friendly furniture and equipment.	Each sensory room: 100m²
Family Sections		400m²
Detail	Comfortable areas for family members, including lounge spaces and private meeting rooms	Each section: 100m²
Sports		
Bowling Alley		1000m²
Detail	Quiet lanes with soft lighting and minimal sensory distractions	200m²
Swimming Pool		300m²
Detail	Warm water, gentle lighting, and soundproofing to minimize echoes	
Cycling Track		100m²
Detail	Smooth, non-glare surfaces with clear, gentle routes	
Martial Arts/Karate/Judo/Tennis/Exercise Class		400m²
Detail	Divided into smaller, cushioned sections with sensory-friendly materials	
Public outreach and awareness		
Psychologist Care Unit		1000m²
Detail	Quiet, private rooms designed to minimize sensory overload & Comfortable waiting areas with soft lighting and calming decor.	300m²
Nurse Room		200m²
Detail	Equipped with all necessary medical supplies	Includes an examination room (100m²) and a small office (100m²)
First Aid		200m²
Detail	Easily accessible from all parts of the building	Includes treatment rooms (100m²) and a storage area for supplies (100m²)
Dietitian Service		300m²
Detail	Consultation rooms designed for private, comfortable interactions	Each consultation room: 25m² (approximately 8 rooms) & Includes a small kitchen area for diet demonstrations and food preparation (100m²)
Service and Circulation spaces		
Staircases		300m²
Detail	Gentle lighting and non-slip surfaces	Wide steps and handrails at appropriate heights
Toilets		500m²
Detail	Individual stalls with enough space for assistance if needed	Sensory-friendly features like soft lighting and soundproofing
Baths		200m²
Detail	Separate areas for different activities with easy access	Sensory-friendly fixtures and non-slip surfaces
Cleaning Units		100m²
Detail	Well-organized and accessible	Located strategically throughout the building
Corridors		550m²
Detail	Wide and spacious to avoid crowding	Clear signage and wayfinding aids. Calming colors and artwork
TOTAL 5500m² +/- %10		

Concept 2: Natural evolution and improvment

In the "Garden of Growth: Learning Center for Teenagers with Special Needs: Autism," flexible adaptation with technology plays a vital role in creating an inclusive and responsive environment. Smart classroom systems, such as adjustable lighting, sound control, and digital learning tools, are integrated to cater to each student's unique sensory and learning needs. These technologies enable the space to adapt in real-time, providing personalized support through interactive visual aids, customizable seating arrangements, and adjustable routines, ensuring a balance between structure and flexibility. This approach helps students navigate their learning environment more comfortably, fostering independence and growth.
